## SCHOOL CHILDREN ALL SET FREE TO ENJOY VACATION

#### Automobilists Cautioned to Prevent Accidents to Little Ones.

The chances of running over a small child are considerably greater than they were twenty-four hours ago.

Total enrollment in the public schools of the District the past school year was 57,000. Of this figure about 6,000 or 6,500 were high school students, none of whom has been at school for some days. Those who perforce continued attendance until yesterday were grade school children whose number is between 50,000

"School attendance," said Assistant Superintendent E. L. Thurston depends a more other factors on the presence of among other factors on the presence of factories in a city and the visilance with which school and factory daws are executed when factories do exist." In Washington there are no factories to cause children to drop out of school at an early age as in other cities where by hook or crook compulsory education and anti-child labor laws are violated.
